

# Eyebrow Installation 40-45"

## STEP 1

Measure the width of your opening to the nearest quarter inch. Refer to the "Finding Your Rise" chart (see the "Finding Your Rise" chart on the right), and find the width of your opening.

## STEP 2

Measure and mark down from the header the rise as indicated in the "Finding Your Rise" chart that corresponds to the width of your opening.

## STEP 3

Refer to the "Finding Your Rise" chart and find the width of your opening in order to find the measurement needed for cut off of each half of the arch. Cut off the excess arch on each half marked "Cut Side" (square cut / 90° angle).

## STEP 4

For an opening deeper than a 2X4 wall, simply finish the "split cut" on each half and separate into 2 pieces. Install each piece, one on the front and one on the back of your opening (up to 16"). Cover entire opening with sheetrock.

## STEP 5

Align each pre-cut mitered end of the arch to the rise mark on the stud. Using a nail gun (or screw gun), attach each half to the stud. Nail (or screw) each half into the header.

## STEP 6

That's it! Remember, you can use the arch as a template for cutting your sheetrock after it is installed.

## Finding Your Rise

Width of Opening	Rise	Cut-Off (each half)
40	6 3/8	2 1/2
40 1/4	6 1/2	2 3/8
40 1/2	6 1/2	2 1/4
40 3/4	6 5/8	2 1/8
41	6 3/4	2
41 1/4	6 3/4	1 7/8
41 1/2	6 7/8	1 3/4
41 3/4	7	1 5/8
42	7	1 1/2
42 1/4	7 1/8	1 3/8
42 1/2	7 1/8	1 1/4
42 3/4	7 1/4	1 1/8
43	7 3/8	1
43 1/4	7 3/8	7/8
43 1/2	7 1/2	3/4
43 3/4	7 5/8	5/8
44	7 5/8	1/2
44 1/4	7 3/4	3/8
44 1/2	7 7/8	1/4
44 3/4	7 7/8	1/8
45	8	0

### Video Demonstration?

Go to [www.arch-rite.com](http://www.arch-rite.com) and select the appropriate style of Arch-Rite® that you have purchased.

### Are nail guns OK?

Yes! In fact, we prefer you use nail guns (screw guns are ok as well).

Standard safety precautions should be taken when installing Arch-Rite® arches. Installer should be familiar with safe operating procedures for power tools, wood working tools, and ANY ladders necessary for installation. The installer should follow published installation instructions and wear proper head and eye protection. Arch-Rite® and its Licensees assume no liability for any injury or accident as a result of installing any Arch-Rite® products.
